Usage Restriction

According to the test results, this grade can therefore safely be in direct contact with dry, moist and fatty foods. There are no objections to the use of the tested material for aqueous and moist foods, provided that it is suitable for the intended purpose in terms of its physical properties.

Retraceability

Each pack is labelled/printed with a production code. Based on this code the pack can be traced back with the HOSTI quality management system.

Das naturbewusste Einweggeschirr!

Heavy metals

Our products comply with Directive 94/62/EC with regard to the content of heavy metals.

Non-intentionally added substances (NIAS)

Reaction and degradation products of formulation components (so-called NIAS) can arise in the finished article as a result of the manufacturing process. In the NIAS screenings carried out, no substances of concern above the detection limit of 10 ppb were detected.

Dangerous substances

The product group does not contain any dangerous substances of very high concern (SVHC-list of ECHA) in reference to the REACH regulation (EC 1907/2006).

Dual-use-Additive

Dual-use additives are not used.
