Hygiene and cleaning. Directly from the manufacturer. For over 45 years.

Franz Mensch is an owner-managed family company in the second generation located in Buchloe in Germany.

For over 45 years we produce and trade world-wide with disposable articles, hygiene clothing and professional safety products.

Choose from a **wide full range** these products which exactly fit the needs of your customers – one supplier for everything.

Your big advantage: Franz Mensch delivers so reliably and fast like no one else. Because we have your desired items at **99% in stock**. You order comfortably your desired articles and we do the rest.

We see ourselves as an innovative and growing company with the ambition to continuously improve, to develop new innovative products and to produce and trade sustainably.

Our company is ISO 9001:2015 and FSC™ certified.

manufacturer!*

Sustainable and innovative!

Environmental awareness and disposable products are not a contradiction. On the contrary: the brand **NATUREStar** stands for disposable products made from 100% renewable and compostable raw materials. Ideal for those who need disposable products for hygiene

reasons, but still value sustainability. Convince yourself of the organic cleaning products and request your free sample. Another advantage: the special hygienic papers made of recycled material are food safe and even more favourable than standard cellulose products.

Multi-purpose cloth TETRA BIO | viscose / PLA mixture

- **compostable cleaning cloth**
- made of viscose / PLA mixture
- very tightly needled, very hard wearing
- reusable
- especially for cleaning stainless steel without streaks and smears

40 x 38 cm, approx. 135 g/m² **NEW**

PU/roll: 6

How the remaining waste becomes an ecological hygienic paper

Knew how! The remains of a paper factory, so paper and cardboard, are not thrown away but simply recycled. This results in environmentally friendly tissue paper – guaranteed from 100% ecological recycling tissue!

The advantages:

- sustainable and environmentally friendly production (FSC certified goods)
- food safe
- more favourable than alternatives made of cellulose

Information about the V-fold on page 36

NATUREStar

Bio folded towel V-folded | recycling tissue

- **sustainable and more favourable** than papers made of cellulose
- very absorbent and hygienic, embossed structure, 2-ply
- advantage V-fold: the cloth is taken unfolded, the next is available at hand
- ideal for highly frequented washrooms
- suitable for paper towel dispenser art. no. 88836

23 x 19 cm **NEW**

nature brown

304035

PU/piece: 20 x 225

NATUREStar

Bio cleaning paper roll | recycling tissue

- **sustainable, more favourable alternative** to conventional papers
- **food safe**
- very absorbent, tear-resistant and hygienic
- embossed structure, perforated, 3-ply
- for all wiping operations (oils, greases, water)
- suitable for floor stand art. no. 88832 and wall holder art. no. 88834

24 x 25 cm, roll of 800 sheets, approx. 200 running meter **NEW**

HYGO CLEAN

Highly effective cleaning products for professionals

✓ Full range: from very favourable up to high quality

Discover a full range with more than 400 cleaning products at Franz Mensch. Under the name of **HYGOCLEAN** you'll find everything you need for a professional cleaning. Your biggest advantage: You only need one supplier for all your needs.

- sanitary papers for washrooms and production halls
- cleaning cloths and wipes
- waste bags
- brooms, scrubbers and brushes
- cleansing agents
- hand disinfection and cleaning
- dispensers and wall mounts

✓ Powerful brand **HYGOCLEAN**

HYGOCLEAN stands for high quality products for a continuous hygiene chain. The cleaning products are certified and suitable for the use in very sensitive sectors like food industry, kitchens and medical areas.

✓ Protective and hygienic clothing

The perfect complement: cleaning gloves, disposable gloves, protective clothing from head to toe made by Franz Mensch. That's what the brands **HYGOSTAR** and **HYGONORM** stand for.

✓ Service: impressive logistics

At Franz Mensch you buy more than just cleaning products. Save yourself a lot of time and effort and benefit from a unique inclusive service. From storage via call orders and distance delivery to the complete logistics: we do it. Quick, reliable and convenient for you.

✓ Long-term top conditions

No matter which brand product you decide on: with Franz Mensch, the price-performance ratio is right. You benefit from permanently low manufacturer prices.

Hand protection – For healthy, strong hands

It's worth it: buying gloves at a professional

In the field of gloves Franz Mensch has an unique range which meets every demand. Find the correct gloves especially for cleaning works which protects you from wet, cleansing agents and other risks.

The challenge: to reconcile safety regulations, comfort and not least the price. We at Franz Mensch know that and have the right gloves for your needs.

Disposable gloves – flexible use

From very favourable gloves for short-time use up to high quality gloves for long-term applications: you will like the range of disposable gloves.

- special gloves with **long cuffs** – protects wrist and forearm
- various colours to identify different working areas
- suitable dispensers for a gapless hygienic system

Your choice of materials

- nitrile: particularly skin-friendly; first choice when it comes to disposable gloves
- latex: very elastic, fits like a second skin
- neoprene: high quality with a very high level of protection

As a manufacturer Franz Mensch offers you innovative new products like the nitrile glove POWER GRIP. Its double-sided anti-slip structure provides an excellent grip. Therefore you have even slippery, oily or soapy items completely under control.

Cleaning gloves and chemical protection

Hand protection means also skin protection. A frequent handling with wetness and cleansing agents can damage your skin. Use the suitable protection glove to keep your skin and hands healthy. Choose from a wide range: from classic household gloves to professional protection gloves against chemicals and solvents.

What is neoprene and what advantages does it have?

Neoprene is like nitrile, a synthetic material (synthetic rubber). It is extremely resistant, waterproof, heat-insulating and has excellent insulation properties. Neoprene gloves are more elaborate and in production a bit more expensive. Due to their high protection performance they are ideal as chemical protection.

The 6 most important advantages of neoprene:

- elastic and safe against microorganisms (like latex)
- resistant to chemicals/acids (like nitrile)
- latex free and very skin-friendly
- tough and very adaptable
- good wearing comfort
- very good price / price-performance ratio

Differences to other materials:

- more elastic, softer and more flexible than nitrile
- better mechanical properties than latex
- more resistant to chemicals than nitrile
- better resistance to oils / greases than latex

NEO STRETCH PRO | neoprene – art. 261171

HYGO STAR

HIGH RISK | latex

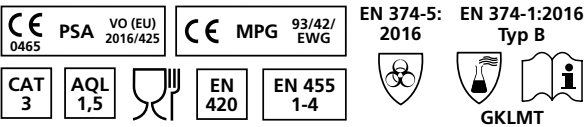

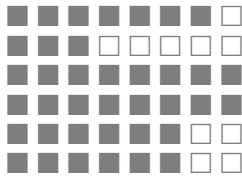

- **increased mechanical and chemical resistance**
- particularly strong latex, powderfree
- allergy arm thanks to chlorinated inside
- very robust and durable

Hygienic papers – Simple solution for fast cleanliness

Cloths made of paper are ideal for washrooms and sanitary facilities. Papers are also great as cleaning cloths for an intermediate quick cleaning.

Paper cloths – 3 decisive advantages

Papers are in the lead in hygiene-sensitive areas compared to other systems (such as fabric towels, air dryers):

- Advantage hygiene: Papers are disposed immediately after use. This does not spread germs in the environment. Especially hygienic is the storage in the wall holder, which incidentally also ensures a more economical consumption.
- Advantage efficiency: Papers dry more efficiently as towels. Especially in the medical sector, where after washing a disinfectant must be applied, papers are the better alternative. The same applies to catering and food areas, where after washing hands disposable gloves are tightened.
- Advantage acceptance: If you ask the users themselves, the majority would choose paper towels.

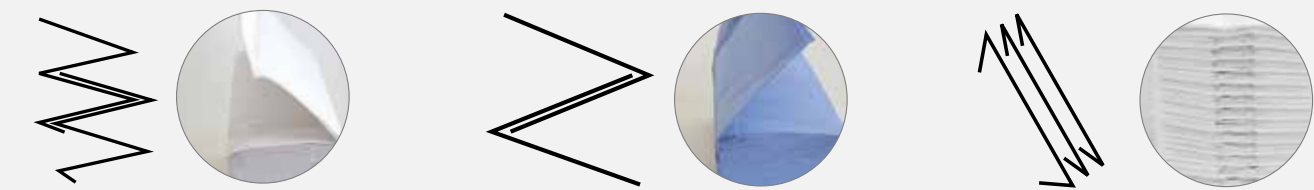

Franz Mensch offers hygienic papers in different qualities and price levels. Environmental awareness and **sustainability** are very important to us. Therefore you'll find many products made of recycled material.

Important applications for hygienic papers

- washrooms
- sanitary facilities
- changing rooms
- recreation rooms
- patients rooms
- production areas
- hotel rooms
- public areas

Folding techniques

Interfold NW-folded

Interfold NW-fold are fully unfolded, ready to use wipes. Individual removal from the dispenser means that only one towel is touched. The sheet is removed unfolded and the next sheet is ready for removal. The paper is folded longitudinally, then the right and left sides are folded by half to the outside. The towels lie on top of each other.

V/Z-folded

V/Z fold are paper towels which can be withdrawn from the dispenser individually and deployed as a ready to use cloth. The sheet is removed unfolded and the next sheet is ready for removal. The sheet are folded in a Z configuration, as the name indicates. The towel is folded once in the middle and inserted inside the next towel in a concertina configuration.

C-folded

C-folded is a classic conventional folded towel. It is folded in a C shape. This special fold means that the towel is used either folded or unfolded. The towel is folded once longitudinally and then right and left folded to the middle. The folded towels are placed on top of each other. When removed from the dispenser, contact is made with the dispenser and the subsequent towels.

Folded towel | recycled paper / cellulose

- embossed
- 3 different folds
- good drying for fast hygienic results
- for high frequented washrooms
- ideally suited in the food- and processing sector

Garbage bags – Hygienic waste disposal

Waste bags made by HYGOCLEAN convince due to their diversity. You find all conventional sizes, different colours, closure types, materials and strengths – depending on the required carrying capacity and the price level.

Polyethylene (PE)

is a thermoplastic material, which is ideal for use as a garbage bag / waste bag due to its hightemperature and strain resistance and its resistance to acids, alkalis, alcohols, oils and water. A distinction is made between PE with low (LDPE), middle (MDPE) and high (HDPE) density. What are the differences?

HDPE (High Density Polyethylene)

HDPE is very strong, stiff and rustles like paper. Characteristics from HDPE trash bags / garbage bags:

- tough-elastic
- hard, smooth surface – „crackling foil“
- lightweight, very favourable, high load capacity
- star welded
- suitable for each type of normal domestic waste

LDPE (Low Density Polyethylene)

LDPE is significantly softer and more flexible, but also less durable. Due to the higher strength properties, HDPE foils can be produced up to 5.000th of a mm (5 my), LDPE foils are usually not thinner than 12 micron.

Characteristics from LDPE trash bags / garbage bags:

- soft-elastic
- waxy surface – „shiny foil“
- extremely tough and tear-resistant
- suitable for each type of normal domestic waste
- eco-friendly

Bio foil

Bio foil consists of the innovative bio plastics based on corn starch. This foil is 100% biodegradable and does not contain any PE plastic. It is very stable and heat-resistant up to 90°C.

Disposal/Recycling:

- Through industrial composting the material decays to CO₂ and water.
- Fermentation produces recyclable bio gas.
- Through a unmixed recycling the used CPLA can be collected as corn starch once again, like this it can be reused in the next step for manufacturing new bio plastic products.

HYGO CLEAN

Garbage bag | LDPE

- the best-selling garbage bag at Franz Mensch
- **great in price and performance**
- particularly tear-resistant and hard wearing
- on roll for a quick removal
- tip: available in **different colours** for working with a colour system to mark different hygiene areas

- filling capacity: approx. 7 litres, matching garbage bag: art. no. 32990
- perfect for everyday waste
- **clean and elegant solution** for all toilets and washrooms

35 x 21,5 x 11,5 cm **NEW**

silver88961PU/piece: 1

Cleaning hint

for all Franz Mensch stainless steel dispensers:
Do not use chlorine- and salt-based cleaners as they can cause rust formation. Hard or grainy surfaces cause scratches! The units should be cleaned inside and outside with mild soap suds and a soft cloth. Polished surfaces should be wiped only in the direction of grinding. Please use microfibre cloths or other soft cloths.

HYGO

Trash can with hygiene bags holder | stainless steel

- **integrated dispenser for feminine hygiene bags**
- with hinged lid, filling capacity: approx. 7 litres

Cleaning cloths – Professional cloths for hygienic results

The biggest advantage of a good cloth is its economic efficiency. With professional cloths you work quickly, thoroughly and therefore time-saving.

The cleaning cloths made by **HYGOCLEAN** are especially designed for high demands of a professional cleaning. They are great for sensitive sectors where the focus is on hygiene and germ reduction.

5 good reasons for HYGOCLEAN cloths from Franz Mensch

- huge range: from very favourable items up high quality
- special cloths for hygiene-sensitive sectors like food industry, kitchen, industry and medical care
- sustainable alternatives made of organic raw materials
- impressive logistics: dispatched within 24 hours
- permanent attractive terms

Material characteristics cloths

Airlaid

- biodegradable
- food safe
- high strength

Cellulose

- very absorbent
- also absorbs oils and fats quickly
- as spunlace: perfect for sensitive surfaces

Microfibre

- abrasion resistant
- durable
- high cleaning factor

PET

- uniform delivery of the disinfectant solution to the surface
- lint free
- solvent resistant

Viscose

- textile character
- extremely absorbent
- pleasantly soft

white, approx. 50 g/m²
40 x 38 cm, roll of 750 sheets 317400 PU/roll: 1
40 x 36 cm, pleated of 50 cloths 317420 PU/piece: 12 x 50

HYGO CLEAN

Cleaning cloth SPUNLACE STRONG | cellulose

- mix made of cellulose fibre and PP nonwoven, similar to textile
- embossed honeycomb structure
- extra high absorbency (6 times its own weight)
- reusable
- extremely efficient, very soft voluminous touch
- universal cloth for many applications

white, approx. 70 g/m²
40 x 38 cm, roll of 500 sheets 317500
32 x 36 cm, pleated of 50 cloths 317510 PU/roll: 1
PU/piece: 12 x 50

HYGO CLEAN

Cleaning cloth | cellulose

- **very absorbent** thanks to double creped cellulose
- fast fluid intake of 6 times its own weight
- very soft and handy
- wet and dry abrasion resistant
- solvent resistant

blue, approx. 80 g/m² **NEW**
34 x 29,5 cm, roll of 800 sheets 317506 PU/roll: 1
38 x 30 cm, pleated of 50 cloths 317516 PU/piece: 10 x 50

HYGO CLEAN

Garage cloth | cellulose / PES

- **high quality material mix:** 56% cellulose / 44% polyester (PES)
- high-absorbent pulp combined with abrasion-resistant polyester (PES)
- pleated or on roll
- absorbs liquids quickly
- removes greases, oils, varnishes and paint residues
- **able to wring out and wet usable**
- ideal for dust and finsensitive areas
- soft, especially tear-resistant and **easy to fold, therefore perfect for narrow corners**
- for residue free cleaning and polishing
- also usable with solvents

grey, 42 x 38 cm, approx. 70 g/m² **NEW**
roll of 400 sheets 317880 PU/roll: 1
pleated of 140 cloths 317881 PU/piece: 5 x 140

MICRO WAFFLE

- 80% polyester, 20% polyamide
- **special waffle structure for high grease, dirt and water absorption**
- extremely absorbent and lubricious, silicone free
- for all cleaning work in kitchen or car care

40 x 40 cm, approx. 300 g/m² **NEW**
blue 317665 PU/piece: 5 x 10

MICRO MASTER FLOOR

- 80% polyester, 20% polyamide, woven, velvety quality
- very high water, grease and dirt absorbent
- for polishing and cleaning sensitive floor surfaces

50 x 60 cm, approx. 260 g/m²
blue 317663 PU/piece: 5 x 10

MICRO MASTER STRONG

- 88% polyester, 12% polyamide
- **extra strong quality**

40 x 40 cm, approx. 320 g/m²
pink 317650
blue 317660
green 317670
yellow 317680 PU/piece: 5 x 10

MICRO MASTER DISHES

- soft professional cloth (80% polyester, 20% polyamide)
- absorbent, excellent cleaning quality, lint free
- for polishing like dirt plate and cleaning sensitive floor surfaces

40 x 40 cm, approx. 185 g/m²
blue 317661 PU/piece: 5 x 10

MICRO MASTER STANDARD | polyester mixture – art. 31766

Microfibre cloth
MICRO MASTER STANDARD |
polyester mixture

- 80% polyester, 20% polyamide, knitted
- very soft, hard wearing, reusable
- can be used wet and dry
- **very good water absorbent capability**
- do not use fabric softeners
- wash separately or with similar colours
- especially suitable for rough surfaces with severe soiling, good grease absorption

40 x 40 cm, approx. 260 g/m²
pink 31765

Cloth HYGOWIPE PREMIUM | PET – art. 31552

Desinfection with a modular system!

The HYGOWIPE system consists of a dispenser that is filled with a nonwoven roll of cloths which can be torn off individually. It is a surface disinfection system for hygiene relevant establishments such as gastronomy, large kitchens, hospitals, laboratories or food processing businesses.

The advantage for you:

- good release of the agent to the surface
- for soaking with all surface disinfections
- refillable dispenser system

Tip:

The HYGOWIPE system can be filled individually. Franz Mensch offers you a wide range of cleansing agents and disinfectants. You will find them on page 81.

The secret of success – the reason:

The HYGOWIPE is made of **100% PET fibres** (Poly-Ethylen-Terephthalat). In comparison to other materials, the wipe is outstanding and unique. The reason: no compared wipe has so many advantages concerning the reception and release of the disinfection lotion. After the filling of the dispenser, the nonwoven roll absorbs very quickly and completely. Afterwards, the practical disposable wipe distributes very well and equally the absorbed lotion – for a surface disinfection with constant perfect quality. The our **synthetic fibre PET** could also convince concerning possible mutual reactions between disinfection lotion and non-woven wipe – for instance for so called behaviour of adsorption. Adsorption means the adsorption of molecule of the disinfection lotion on fibres of the wipe. This should be avoided because the active ingredient will not be released optimally. Also in this case comparing examinations give clearly PET the advantage.

HYGO CLEAN

Cloth HYGOWIPE | PET

- cloth quality with textile character (100% PET)
- can be filled individually (surface disinfection/ cleaning substances), solvent resistant
- good delivery of the liquid
- **very absorbent, lint free, tear resistant**
- very good absorption behavior
- economical in consumption, without wastage
- lotion soaked wipes useable within 4 weeks

Brushes & brooms – Specifically for kitchens, food areas and industry

Discover the big range of brushes, scrubbing brushes and brooms on the following pages. **HYGOCLEAN** provides suitable and professional equipment for all cleaning purposes: whether cleaning production halls, outside surfaces or sensitive hygienic areas in kitchens and food industry.

Hygienic brooms – according to HACCP

The hygienic brushes and brooms made by **HYGOCLEAN** are especially suitable for food areas.

- high quality plastic (PBT): more hygienic than wood, because germs have no chance
- very long-life fibres
- temperature resistant up to 130°C, can be cleaned hot and also used at high temperatures e.g. in sterilization process
- food safe
- for hygiene-sensitive areas

Industry brooms and brushes

- great for extensive surfaces in halls, production plants or outside surfaces
- wooden body of high quality
- bristles made of coconut or artificial hair

Systematical hygiene

Perfect accessories: Handles made of very lightweight carbon or aluminium offer a comfortable working and are compatible with all **HYGOCLEAN** scrubbing brushes and brooms. Furthermore you get useful broom holders for an easy wall mounting.

Cleansing agents – Effective cleaning and disinfection

Industrial cleaning has to meet the legal requirements. At the same time cleaning has to be efficient to handle. At **HYGOCLEAN** you find a full range of cleansing agents for a professional industrial cleaning. The products are specially designed to fulfil the demands in kitchens, food productions, sanitary rooms and medical applications.

Company hygiene is about cleanliness. Part of this are the cleaning and disinfection of working rooms, means for work and machines.

In the field of **staff hygiene** you count on professional products which protect skin and hands effectively. At Franz Mensch you will find high quality soaps, hand disinfections and skincare products which are suitable for the everyday use in professional areas.

In combination with suitable dispensers and wall mounts an efficient hygiene system results. In this way you fulfil all demands according to staff and company hygiene.

5 things, you should know about disinfection

1. Disinfecting means germ stop. Unlike cleaning, pathogens are killed during disinfection.
2. Disinfection does not remove 100% of the germs. This is called a germ reduction. After disinfection, the quantity of active germs is so small that they can no longer spread.
3. Disinfection is only effective when hands, surfaces or instruments are completely wetted.
4. Disinfecting is more skin-friendly than washing. A good hand disinfection does not harm the skin flora and even cares for the skin.
5. Handle disinfectants carefully. Impact time, dosage and intended use must be strictly adhered to. This is the only way to obtain the desired germ protection.

HYGO CLEAN

- versatile detergent washing-up liquid
- for a quick cleaning of dishes, cutlery, porcelain, glass and kitchen equipment
- ph value approx. 7

1 litre bottle	31610	PU/piece: 12
----------------	-------	--------------

Hand protection

Hands have a very demanding job. They often have to withstand moisture, acids, detergents or even germs in the workplace – and still give their best every day. Franz Mensch has now included a unique hand protection system in its product range, to make sure that your hands are always cared for and protected and, most importantly, that they stay healthy. In this way you also fulfill all relevant regulations of the professional association with regard to worker protection. Hand protection is obligatory.

Skin care plan – „Healthy skin according to plan“

Protection		Cleaning		Care	
gloves	hand protection lotion	disinfect = protects from germ	washing = remove dirt		
wet conditions, moisture, acids, oils, bacteria, fungi or cleaning agents affect the skin	sweat eczema between the fingers, moisture and wet conditions due to long-term use of gloves	contamination by bacteria, viruses and fungi	dirt, personal hygiene	irritations, sore and dry skin	risk
wear protection gloves, depending on the intended use (skin and germ protection)	apply hand protection and barrier lotion before each use of gloves, additional effect on sore skin	use alcoholic hand / skin disinfection, it protects from germs	wash hands with mild detergent lotion	apply nourishing hand cream with soothing and moisturizing effect	this helps
	Hand protection F 	Hand disinfection 	Soft Neutral 	Hand care 	product
Choose the suitable gloves depending on the intended use, only wear them as long as necessary, change them often in case of long-term use. Advice: powderfree disposable latex, vinyl or nitrile gloves.	Apply on clean and dry hands, put on gloves, wash hands after work and apply caring lotion. Advice: According to the professional association (Berufsgenossenschaft) it is necessary to use hand protection when wearing gloves for more than 20 minutes.	Apply lotion (3-5 ml) before, after or between different worksteps and rub in for at least 30 sec. Don't save on lotion. Don't forget thumb, nails and between fingers, for the hygienic and surgical hand disinfection as well as in contact with food.	Apply a small amount of undiluted lotion after hand disinfection or if necessary, in between on moistened hands, foam up and rinse off.	Put on a small amount of lotion after work and after washing hands, use it sparingly!	instructions

Hand care cream – art. 31586

HYGO CLEAN

Protection and barrier cream
Hand protection F

- ideal if you work often with disposable gloves
- **forms a protective film on the skin**, reduces heat buildup and soaking of the skin

Hygiene quick test

Clean Card PRO

- fast hygiene test to check your cleaning results
- delivers a clear result in **just 30 seconds**
- the test card shows what is not visible to the naked eye: proteinaceous soiling, cleaning residues, disinfectant residues
- reveals cleaning deficits, raises employee awareness
- fast visualization, **easy to handle**

starter set

25 controll cards, plastic bottle with spray nozzle, analysis card
starter set 31510 PU/piece: 1

refill set

50 controll cards, analysis card
refill set 31520 PU/piece: 1

Test report

- DIN A4 with 50 sheets

DIN A4 block
50 sheets 31500 PU/piece: 1

Clean Card PRO – Safe and clean in only 30 seconds

With the Clean Card the traffic light goes on **GREEN**

- 1) Preparation: Fill fresh drinking water (cold or room temperature) or distilled water in a spray bottle. Take Clean Card PRO out of the box, without touching the perforated part with the fingers.
- 2) Moistening: Moisten the surface with water from the spray bottle. Just spray two times.
- 3) Wiping: Rub strongly with the test card over the surface for several times. It's important to press the perforated part of the card strongly against the surface (abrasion). Make some circles and zigzag lines so the liquid can move into the testing field.
- 4) Analysis: Wait for 30 seconds and compare the colour of the test card with the analysis card enclosed. You also can use your own Clean Card tests to compare your tests with each other.

- Requirements insufficiently met
