

DETECTABLE PRODUCTS

For more food safety according to HACCP

DETECTABLE PRODUCTS

Hygiene, safety and quality in the food industry

In the food, pharmaceutical, cosmetics and chemical industries, the legal production requirements are high. Clothing or working materials that enter the production chain unnoticed may have serious consequences. This can be effectively prevented by using detectable products. Due to specially incorporated metal particles, detectable articles offer a clean and safe solution, as they can be recognised, i.e. detected, by metal detectors. The detectors work like sniffer noses and uncover foreign objects and impurities. The blue colour additionally provides visual detection, as blue food does not exist naturally.

To ensure an optimal quality management, the use of an inspection system such as a metal or X-ray detector is important. It offers protection against defective products and expensive recalls and also guarantees compliance with HACCP and IFS requirements.

There are basically two possibilities: Metal detectors or X-ray detectors. Metal detectors recognise electromagnetic parts, such as an incorporated metal band in a cap or an aluminium foil in a plaster. An X-ray detector, also called X-Ray, penetrates the product with radiation and determines the density. If this deviates from the food, the foreign object is recognised as such. The different density can be caused for example by specially integrated threads in a plaster. Both systems work very reliably. It is only important that you provide your employees with the detectable products that fit to your system.

At Franz Mensch, all detectable products are marked with a sign. This way you can immediately see which articles are suitable for metal detectors and which articles are suitable for X-ray detectors. Many products are detectable by both detector systems and therefore have both signs.

Discover a wide range of detectable products that perfectly round off your HACCP concept and also make your production safer.

■ OFFICE SUPPLIES

Detectable pens in various colours and designs, markers, clipboards and more.

■ WORK EQUIPMENT

Find everything from document and card holders, key chains and cable ties to detectable brushes, brooms and shovels.

■ SAFETY KNIVES

Be on the safe side and equip your employees with detectable, injury-proof safety knives.

■ BODY PROTECTION

Detectable protective clothing from head to toe.

■ FIRST AID

Safety first! Be prepared for emergencies with detectable first aid kits and plasters.
