

■ 100 % paper, 100 % plastic-free

■ simply dispose of in waste paper

■ water-based sealant

The **Only Paper** range  
Natural, sustainable, forward-thinking

# Only Paper

Simply dispose of in waste paper

## No plastic, no residues – only paper:

With the sustainable Only Paper range from Franz Mensch, you can now dispose of your waste in an environmentally friendly way. All bowls, cups and lids are made from renewable, fresh paper fibres and are **fully recyclable via waste paper**.

The main problem with conventional paper cups is the plastic coating on their inner surface. While this coating ensures the tightness and food safety of the cups, it also leads to many of them ending up in landfills or in nature. There, they take decades to decompose. Even alternative organic coffee cups

with plant-based PLA coatings, which are produced in an environmentally friendly way, encounter similar disposal problems. This is because these cups would have to be sent to special composting facilities, which often do not exist in practice.

To counteract this problem, Franz Mensch has developed the **environmentally friendly Only Paper range**. The Only Paper products are sealed on the inside with a natural water-based protective layer so that they remain leak-proof for a long time. Instead of burning, Only Paper cups are recyclable through waste paper. This way, you consciously set an example for environmental protection.

## Advantages Only Paper

sturdy, high-quality paperboard

food-safe colour

tight, very stable, well insulating

inside with water-based sealant

from renewable raw materials

belongs in waste paper, 100 % plastic-free

Dispose of in **waste paper**

**Fully recyclable**
