KRAFT PAPER

very stable – natural look – favourable

The German word "Kraft" means power. As indicated by the name, "kraft paper" is strong and provides a **maximum of stability**. It is the strongest type of paper and made from very long wood fibres, mostly pine or spruce. The production is very natural – no bleach, no chemicals. 100% sustainable and from renewable raw materials. Food packaging from **NATUREStar** are made of pure fresh fibres. Therefore the products are certified for the contact with food of any kind. Kraft paper is ideal for cups. Due to its smooth surface it provides a great drinking experience. Another advantage: Kraft paper is **more favourable than tableware made of sugarcane or wood**. The natural brown colour is typical for kraft paper. Your customers realize immediately that this is a **sustainable packaging**. In brief: It is the perfect material for food trucks, street food, modern gastronomy, fast food and high-quality food to take away. More than transport containers for food: With a promotional printing they transform to your individual advertising messenger. All kraft paper products can be printed – very favourable and even for small amounts. The alternative:

The products of the signature collection with its unique **NATUREStar**-Look.

SIGNATURE COLLECTION
